10	7'-8"	Legs	Black

**10x40 STANDARD HIP END - FRAME TENT**

**INSTRUCTIONS :**

1. Layout four (4) corner fittings, eight (8)(white 9°4"), and (4) (4 '4") spreader pipes and form a perimeter frame. Assemble nails or pins.
2. Assemble three (3) (white 9'4\*) spreader pipes into two (2) top tee fittings, and two (2) 6-way crown fittings into the center of the frame.

3. On one end, insert one (1) yellow (6'10\*) hip rafter into corner fitting and nail. Then insert the opposite end of the hip rafter into a 6-way crown fitting and nail. Insert one end of another hip rafter into the same way fitting and nail.
4. On the same end, insert one (1) (red 4°1 1") rafter pipe into the same 6-way fitting and nail. Do the same for the opposing side.
5. Repeat steps 3 and 4 for the other end. Insert one end of the center spreader into the assembled 3-way crown fitting and nail. Insert one end of the side rafter (red4'11") into the side tee fitting nail. Do the same for the Opposite. Repeat for all rafters.
8. Place the canopy over the frame and pull tight. Secure the canopy to the frame with buckle straps, tightening the corner buckle first.
9. Raise one side of the canopy, insert leg pipes (black 7'8") into the corner, and tee fittings and nails.
10. Raise the opposite side of the canopy and install the remaining legs.
11. The canopy and frame can now be tied down.

**Caution tie down only at the corner or tee fittings. Do not tie to the spreader pipe as they may bend.**
